## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,358,395 B1 in view of Okazaki, U.S. Patent 5,944,978. The claims of the instant application when read in light of the specification are rendered obvious by the invention described in the prior patent in view of the Okazaki patent.

The prior patent claims the instant method and apparatus for the treatment of water comprising first filter, reverse osmosis housing, a second filter, an electrolytic cell, a tap and an electronic control circuit (see claims 1-18).

The reference does not disclose the use of a mineral supplement device coupled to the housing containing the osmotic membrane or the types of valves or the use of carbon filters. The Okazaki patent discloses the use of the mineral supplement device, the same types of filters and various valves and the benefits obtained by these modification (see claims 1-8 and col. 3, line 8 to col. 6, line 60).

Consequently the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the claims of the prior patent in view of the Okazaki patent, because the Okazaki patent teaches that such modification would produce the improvements described therein.
